

# NOVA SCOTIAN INSTITUTE OF SCIENCE

NSIS FREE PUBLIC LECTURE

April 9, 2018

**7:00 PM**

Halifax Central Library

5440 Spring Garden Rd, Halifax NS

Speaker | **Dr. Sarah Stewart-Clark**  
Assistant Professor

Faculty of Agriculture  
Dalhousie University

## Aquatic Invasive Species in Nova Scotia: Are they Spreading Disease to our Native Species?

Nova Scotia has become a hot zone for aquatic species invasions in the past decade.

We could - like many - examine the ecological impact that invasive species have on our ecosystem.

Dr. Stewart-Clark considers the microorganisms that travel with these species and explores how these tiny bugs might impact native species in Atlantic Canada.

How can we protect our natural habitats? Discover why NS has become a receptive environment to invasive species and the importance of detecting these species as early as possible.
