

NOVA SCOTIAN INSTITUTE OF SCIENCE

NSIS FREE PUBLIC LECTURE

January 8, 2018

7:00 PM

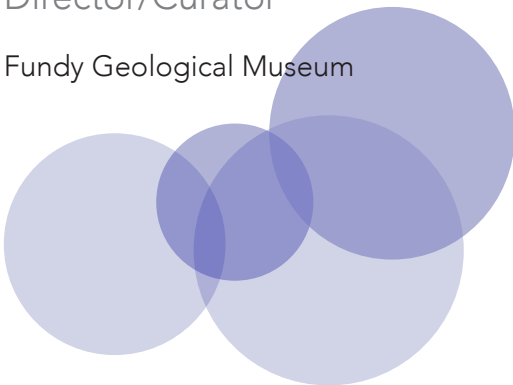

Halifax Central Library

5440 Spring Garden Rd, Halifax NS

Speaker | Dr. Tim Fedak
Director/Curator

Fundy Geological Museum

150 Years of Canadian Dinosaurs & Other Major Fossil Discoveries

Dinosaur research continues to offer new discoveries and surprises, as science continues to refine our understanding of these terrible lizards.

The history of dinosaur research has many interesting twists and turns. Did you know a fossil from PEI was improperly identified as Canada's first dinosaur 150 years ago.

Today in Nova Scotia, researchers at the Fundy Geological Museum in Parrsboro are finding the oldest dinosaur skeletons in Canada.

Hear about the latest discoveries and see how new 3D digital technology is adding new insights into these amazing animals.
